Subject: Second Notice of Intent to Prepare a Groundwater Sustainability Plan (GSP)

Dear Mr. Joseph,

As a follow up to my letter dated February 13, 2017, and in accordance with Section 353.6 of the Groundwater Sustainability Plan Emergency Regulations, this letter is to notify you that the North Kings Groundwater Sustainability Agency (NKGSA) has initiated preparation of a Groundwater Sustainability Plan (GSP) within a portion of the Kings Subbasin in compliance with Water Code Section 10727.8. As of April 13, 2017, the NKGSA has been identified by DWR as an exclusive GSA.

As noted in my February 13th letter, a technical committee comprised of NKGSA stakeholders including member agency representatives, contract entities, interested parties and landowner representatives will be responsible for developing a draft GSP. Updates on the progress of the development of the GSP will be made at NKGSA Advisory Committee meetings and Board meetings at which public comments can be made. Updates on the GSP development will be posted on the NKGSA website along with other relevant information. The Draft GSP will be made available for public comment and a series of public workshops will be conducted to solicit input to finalize the GSP. Further, the NKGSA is working closely with the other GSAs within the Kings Subbasin on coordination issues.

If you have questions regarding this notification, please feel free to contact me at 559-233-7161.

Sincerely,

Gary R. Serrato
Executive Officer/Secretary
North Kings Groundwater Sustainability Agency

NKGSA members are Fresno Irrigation District, Garfield Water District, International Water District, Biola Community Services District, City of Kerman, City of Clovis, City of Fresno, County of Fresno, Bakman Water Company, Fresno Metropolitan Flood Control District.
